Jim Branaum suggested that when working on your electric planes, don't put your transmitter on an easy chair as it can turn the motor on. He talks from stitches on three fingers.

Make sure you put your transmitter on a flat surface. Better yet, remove your prop before working on your electric plane.

George Wilson told us his "Snaped" landing of his cougar.

**NEED AN INSTRUCTOR?**

Call Me,

Thank all of you for sticking with us while we seek to acquire a new flying field for general use.

Remember, we still have flying rights at San Geronimo Air Park. San Geronimo is approximately 5 miles outside of 1604 on Culebra rd. If you have never been out there, you can give Ken Rogers a call. Ken's phone number is on the club roster you have been provided. Ken has a hanger rented at San Geronimo and will be happy to give you an introduction to flying from the Air Park. If your schedule doesn't mesh with his, please call one of the club officers listed in the newsletter and we'll see what we can work out. Remember you must always have a safety observer with you at San Geronimo to watch out for full scale aircraft as it is an active runway.

3 members celebrate a birthday in April. Wish Them a happy birthday when you see him.
